Check Point Software Executives Establish 10b5-1 Trading Plans To Address Expiring Options

REDWOOD CITY, Calif. – April 21, 2005 - Check Point® Software Technologies Ltd. (NASDAQ: CHKP), the worldwide leader in securing the Internet, announced today that two of its executives, Gil Shwed and Marius Nacht, have implemented stock trading programs in accordance with Rule 10b5-1 under the United States Securities Exchange Act of 1934.

Mr. Shwed, Chief Executive Officer and Chairman of the Board, and Mr. Nacht, Senior Vice President and Vice Chairman of the Board, have both established stock trading plans to be in effect for the next 15 months to exercise and sell options that are due to expire in July 2006. The respective plans comply with the company's trading policies.

Mr. Shwed beneficially owns outright or has the option to purchase 31.1 million of the 247.1 million outstanding ordinary shares of the company and Mr. Nacht beneficially owns outright or has the option to purchase 28.1 million of the outstanding ordinary shares of the company. The respective 10b5-1 plans will allow each executive to sell up to 3,000,000 shares that he is eligible to obtain upon the exercise of the stock options that are due to expire in July 2006. Even assuming the sale of all the ordinary shares covered by the 10b5-1 plans, the two executives would remain the company's largest individual shareholders.

Rule 10b5-1 allows corporate insiders and those with access to sensitive financial information to adopt written, pre-determined stock trading plans when they do not have material, non-public information.

About Check Point Software

Check Point Software Technologies (www.checkpoint.com) is the worldwide leader in securing the Internet. It is the market leader in the worldwide enterprise firewall, personal firewall and VPN markets. Through its Next Generation product line, the company delivers a broad range of intelligent Perimeter, Internal and Web security solutions that protect business communications and resources for corporate networks and applications, remote employees, branch offices and partner extranets. The company's ZoneAlarm product line is one of the most trusted brands in Internet security, creating award-winning endpoint security solutions that protect millions of PCs from hackers, spyware and data theft.
